**Re: Flextronics International USA, Inc.'s Amended Response to October 15, 2012
Notice of Potential Liability, Offer to Negotiate for Removal Action, and
Information Request**

Dear Mr. Hitchcock:

My client, Flextronics International USA, Inc., would like to correct one statement in its October 23, 2012 response to your October 15, 2012 Notice of Potential Liability, Offer to Negotiate for Removal Action, and Information Request. Page 2 of my October 23 letter mentioned that we had understood that the drain pipe at a cinder block shed that the APS identified as the likely source of contamination was installed when Summit West was on the Property. It is our current understanding that that pipe was, in fact, installed later, in 2000 or 2001, by David Albright or Frank Failla, when C-Tron was on the Property. This was approximately a decade after Circuit Board Assemblers had left the Property.

Sincerely,

Jimmy F. Kirkland
